

CityNorth is a high-end mixed use development designed for the Thomas J Klutznick Co. and Related Urban Development. Located in the highly successful Desert Ridge master planned community, it is the keystone development for the commercial core and area. The project will include high end retail, fine dining, entertainment, class "A" office space, residential condominiums and luxury hotels.

The finely finished pedestrian spaces will connect the site using paseos and large urban plazas that will include water features, shady outdoor walkways and interesting landscape elements. These spaces will intertwine with the unique architecture to create many exciting urban neighborhoods within the development.

LVA's responsibilities included site plan coordination, theming and design participation for landscaping and hardscape features, landscape and irrigation construction documentation and construction administration.

Project Information

- 144 acres (+/-)
- High end mixed use development
- Refined urban spaces
- Central Boulevard open space with amenities
- Unique landscape treatments
