

Based on the extensive population growth that has occurred in the City, a parks master plan was desired to provide the specific guidance to enhance the City's park system and update the existing master plan. Prepared in 2001, the existing plan required significant updating to remain a valuable tool by City staff. LVA was a critical team member that completed the following tasks:

- Existing land use analysis
- Existing zoning/Planned Area Development analysis
- Land ownership analysis
- Park site suitability criteria ranking

Project Information:

- 255 sq. miles (City Planning Area)
- Comprehensive land parcel location ranking for future acquisition
- Primary focus on the identification, preliminary programming and preservation of Community Park (80+ acres) sites within the City Planning Area
- Extensive public information program including resident survey, workshops and focus groups
