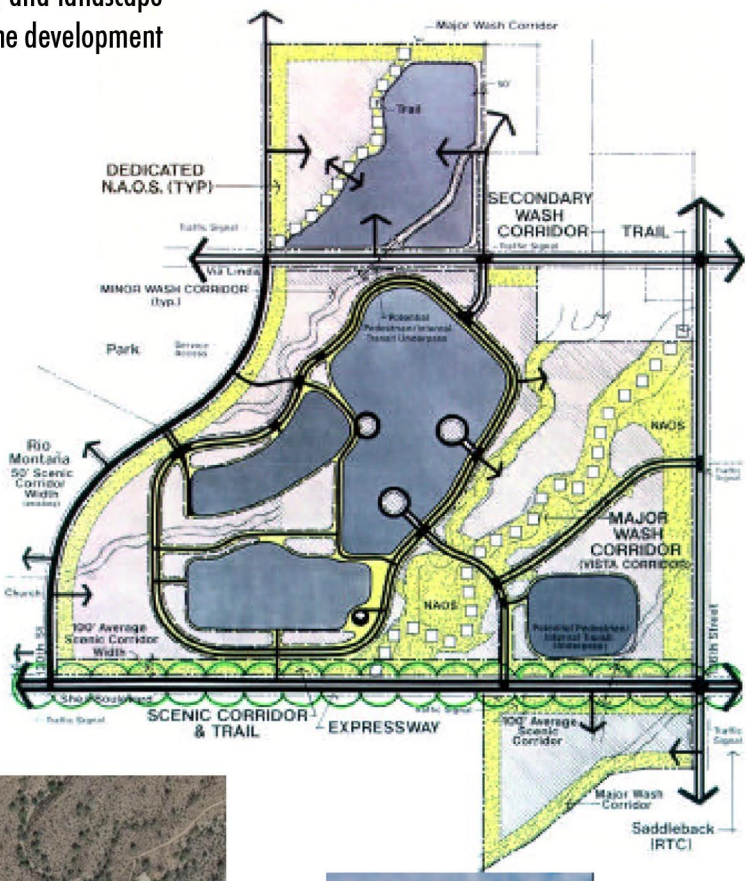
Mayo Clinic Scottsdale, Arizona

Mayo Clinic, Scottsdale, Arizona is a full service medical research and clinic campus setting the standard for medical care. The campus, located in northeast Scottsdale at the base of the McDowell Mountains, is planned to offer services ranging from medical research to clinic care.

The project's locale, the foothills of east central Scottsdale, is a fragile and sensitive ecosystem and the Mayo clinic blends into this landscape through the use of conserved open space, scenic corridor and trail setbacks, and wash preservation.

LVA provided comprehensive master planning, zoning and landscape architectural services, and on-going support through the development process.



Project Information

- 300 acres gross
- Facilities: office and research space, administration offices, clinic facilities, hotel
